DESIGN APPLICATION:

This tree mount bracket is designed to simplify mounting of fixtures in trees. This sturdy stainless steel bracket will not attract insect nesting like enclosed mounts. Nor will it collect water that will drain into the light fixture attached.

The stainless steel hanger bolts are black oxide coated so they do not reflect. They are available in 3", 4" or 5" lengths. In addition, you can specify that a driver bit be included to install the hanger bolts with a drill gun. Driver is specified in the catalog number.

An extension stem and a dual knuckle system can be used to allow for mounting the tree bracket on top of a limb while extending the luminaire out so it can be aimed as needed.
